RE: Closeout Report for Building 790

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the Closeout Report for Building 790, dated October 6, 2003. We appreciate being provided this Closeout Report for our information.

As we have previously requested, Closeout Reports should identify all removal activity and include a map of the facility identifying the structures involved, those removed, and the location of remaining infrastructure and its condition. Infrastructure includes all remaining materials and their location, and includes slabs, piers, footings, water pipes, gas lines, electrical conduits, drain lines, PWLs, sewer lines, etc. These maps are necessary for possible ER and/or future stewardship concerns. The discussion provided does not specifically address the infrastructure remaining or removed. It can only be assumed that part of the slab and in-ground utilities remain. As such, we would appreciate being provided a revised Closeout Report for B790 addressing these concerns.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
